

Handheld Drivers

BEFORE connecting the handheld for the first time please ensure the Windows Mobile Device Center has been installed. When the device is connected for the first time the drivers will be downloaded and install from the web automatically.

Program Install

This section provides a guide to install the BancTec handheld terminal application for use on Windows devices with Datasym Stockade.

<u>Download</u>

Download the latest version from the <u>www.autoidfirst.co.uk\DatasymSupport</u> page.

Datalogic Skorpio X3 Extract

Ensure the handheld is connected. Extract the contents of the file and copy the contents (including all subfolders) to the Flashdisk on the handheld.

Datalogic Skorpio X3 New Set-up

If this is a new installation then switch the device off, remove the battery then depress the Reset Button (in the battery compartment) and the Scan key at the same time. Then reinsert the battery and power the device back on. This will Cold Boot the device and the application will be re-installed.

Datalogic Skorpio X3 Upgrade

If the device has the application loaded and simply needs an upgrade, then on the handheld open the FlashDisk folder and run the upgrade.bat file.

MIS Communicator

This section provides a guide to install and set-up the MIS Communicator software used to interface with BancTec Windows handheld terminal applications.

Download

Download the latest MIS Communicator from the <u>www.autoidfirst.co.uk\support</u> page.

Extract

Extract the zip file to the C:\MIS\ folder

<u>Set-up</u>

In the C:\MIS\ folder activate the MISComunicatorInterface.exe application

MIS Communicator	_	_	2 - X
MISCommunicator is not running	Start as Service	Start as Desktop Application	Stop
Local IP: 172.16.11.99, 192.168.1.96			
	0		
	-		
	rd View Log		
Connections Products Licenses Options	Database		Exit

Products

Click the Products button then New

Product Properti Product Path	ES KC36 (Kalipso Client versio C: WIS V Allow access to other pa ication2	n 3.6) ths	•		 Select KC36 Select the MIS folder <u>TICK Allow other paths (IMPORTANT)</u>

Connections

Click the Connections button then New

Connection Properties 📃 🔀					
Properties Application	n1 Application2				
Description	Connection2				
Туре	TCP/IP 🔻	Active 🔽			
Port	8000	Compression Level			
		Below Normal (Default) 🔹			
		TCP No Delay			
		Disables the Nagle algorithm. Can increase speed of small bursts of data transfer, but also increases network traffic and can have negative impact on network and application performance.			
Timeout	10				
Tries	3				
Timewait	0	Timeout Defaults 🔻			
Password		Encrypted			
Save		Cancel			

1) Enter Connection name

3) Save

2) Enter the port 8000 (unless otherwise instructed, or if port 8000 is already in use)

Test Connection

To check the settings are ok click the Start as Desktop application, this should display a screen similar to the following.

MIS Communicator 🧖 🗖 🔀						
MISCommunicator is running as a desktop application	Start as Service	Start as Desktop Application	Stop			
Local IP: 172.16.12.86						
	0					
Connections Products Licenses	Advanced Options	View Log Database		Exit		

If there are any error messages check that the program is running as "Administrator" and that the port is free. Once working, make a note of the IP Address and Port number used.

<u>Run Time</u>

Once the product and connections has been set-up the MIS Communicator is good to go. The application can be run as a desktop application or as a service from the main window.

Device Set-up

This section provides a guide to set-up the device to communicate with the PC.

At the main menu click the "Powered by BancTec.." text to enter the configuration screen. (1) Then select Config Site, (2) Select the site then click Next. (3) Now set the Server IP Address and Port to the ones that worked from above. Click next a few times until the final screen (4) and click Save.
